

Saman Jejo - Software Developer

SUMMARY

Software developer with **4 years of experience** in full-stack development. I build scalable systems and work as a **teaching assistant in programming** at Malmö University. I'm also completing a long-term **software development internship** at **Ideon Science Park**, where I am the sole developer of a complex project.

I'm now **seeking a full-time software development role** where I can contribute with my technical expertise and problem-solving skills.

SKILLS

Languages & Frameworks: Java (Spring Boot), C#, .NET, JavaScript, HTML, CSS.

DevOps & Tools: Docker, Kubernetes, CI/CD, Git, GitHub, JIRA.

Databases: PostgreSQL.

Other: SEO, Strapi, MailChimp, AirTable, Google Analytics (GA4), Hosting, Maven.

Methodology: Scrum.

PROJECTS

Amyna - National Defense Innovation Platform (Internship project)

- Designed and implemented the **fullstack architecture** for a **secure national innovation platform** connecting startups and government agencies.
- Built **scalable data pipelines and integrations** using Strapi (headless CMS) and **external APIs** (MailChimp, AirTable, GA4) for automated data flow and communication.
- Ensured **compliance with defense-sector security standards** regarding authentication, data protection, and system reliability.

PlanTrip - Full-stack travel assistant (2025)

- Built a **full-stack travel assistant** integrating multiple APIs for real-time flight, entertainment, and destination insights.
- Developed the backend in **Java (Spring Boot)** and frontend with **HTML, CSS, and JavaScript** for a responsive user experience.
- Implemented **containerization and deployment** using **Docker, Kubernetes, and CI/CD pipelines**.
- Integrated **Amadeus, ChatGPT, Spotify and TMDb API** for personalized travel data and recommendations.

HabitView - Health tracking application (2025)

- Developed a **web-based health tracking system** for monitoring sleep, nutrition, and exercise with personalized insights via the **ChatGPT API**.

- Built the backend in **Java (Spring Boot)** with **PostgreSQL**, including **automated testing** and **CI/CD integration**.
- Used **Docker** and **Kubernetes** for scalability, containerization, and efficient deployment.
- Focused on **data accuracy, performance, and user personalization** throughout development.

EXPERIENCE

Ideon Science Park, Software developer – Internship

September 2025 - now

Developing a secure and scalable web platform that connects startups, researchers, and government agencies within the defense innovation sector.

Malmö University, Teaching Assistant – Part-time

March 2025 - now

Assists students with programming, code review, and troubleshooting.

EDUCATION

Malmö University, Malmö – Systems Development

August 2023 - June 2026

Öresundsgymnasiet, Landskrona – *Natural Sciences*

August 2020 - June 2023

LANGUAGES

Swedish - Fluent

English - Fluent

Kurdish - Fluent
